EXPEDITE YOUR INSIGHTS

Expedite your research with the PowerSuite, a collection of fully-automated insight tools on the TolunaInsights platform, designed to guide you from ideation to understanding in just hours. By automating industry proven methodologies, our PowerSuite puts you in the driver's seat, enabling you to conduct your own package, concept, positioning or attitudinal study from anywhere - without ever having to pick up with phone.

- Templated approach ensures repeatable, reliable insights in a fraction of the time of traditional methods
- Critical decision making processes, product development and time-to-market are expedited, with project launch taking mere minutes and insights populating in real-time
- Reporting is diagnostic and enables users to react quickly
- Real-time access to Toluna's global panel of millions, with advanced targeting capabilities enabling you to reach a precisely targeted audience
- Intuitive wizard guides the way; no research expertise is required

A FULL SUITE OF SOLUTIONS

PowerPack

Accelerate your speed to shelf through an intuitive wizard and industry-proven methodology. Users can run package tests to understand the overall strengths and weaknesses of their package concepts ten times faster than traditional methods and at a fraction of the cost.

PowerAttitudes

Gather immediate insights on what attitudes drive usage and purchase behaviour across brands, products and stores.

PowerConcept

With methodology powered by Harris Interactive, users can conduct concept tests in real-time to understand the overall strength of branding, product or advertising concepts.

PowerPosition

Find out what matters most to your customers and how you measure up against the competition.

AUTOMATED INSIGHTS AND RESULTS

Every automated study comes with a robust, real-time reporting suite:

An **Infoboard** of diagnostic and actionable insights.

Seventeen fully editable and customisable **PowerPoint slides** with directional insights.

Advanced analysis and data visualisation capabilities.
